Improvements on the Pacific.
A representative of the INTELLIGENCER,
who took a trip to Kansas City Tuesday,
noted the many and substantial im-
provements that are being made on the
Missouri Pacific line. Rock ballast has
been placed under the ties in several
stretches of track, and is distributed
along the track ready to be put under
several other parts of the road. The
track has been raised in a number of
places and grade stakes set for raising it
in other places. A number of the short
curves are to be taken out and the road
straightened so that faster trains may be
run. The old rails now on the road are
to be replaced by new and much heavier
ones capable of standing the large amount
of heavy traffic that will be sent over the
line. These improvements begin to make
the old road look like it is getting on
main line clothes.

Children often cry, not from pain, but
from hunger, although fed abundantly.
The trouble arises from inanition; their
food is not assimilated, but devoured, by
worms. A few doses of White's Cream
Vermifuge will destroy the worms, when
the children will begin to thrive at once.

We have handled Dr. Moffett's Teeth-
ing (teething powders) every since its
first introduction to the public and trade
as a proprietary medicine, and our trade
in it has steadily increased from year to
year until our orders now amount to two
or three hundred gross per year, which is
very strong evidence of its merits and the
satisfaction it is giving to the mothers of
the country, for they say that nothing so
effectually counteracts the effects of the
summer's hot sun or overcomes so quick-
ly the troubles incident to teething.
